SUPERIOR FIREARMS

## TP9 SF Mod.2

TP9 SF Mod.2 is the ambidextrous version of the TP9 SF model which is a breakthrough in ergonomics for special operations use. A smooth single-action trigger delivers accuracy and fast follow-up shots. It has a fully ambidextrous frame with an ambidextrous slide stop and side changeable magazine catch and also interchangeable backstraps, and aggressive serrations ensure that the sculpted grip meshes comfortably in your hand for greater control. TP9 SF Mod.2 model designed for simplicity, without a decocker, manual safety, or loaded chamber indicator.

## TP9 SF ELITE

TP9 SF Elite model is a medium-sized model of the TP series having a magazine capacity of 15 rounds. The model is entitled to have the title of 'Elite' due to its ambidextrous slide stop, brand-new design trigger safety mechanism, Warren-type fiber optic sight, and closed Striker cover mechanism as well as its shortened grip size.

# SFX RIVAL-S

Steel is forged by exposure to the most intense heat and the repeated impact at incredible force, the product of these trials is the strongest and most durable steel in the world. The fire does not consume the metal but rather makes it more flexible and powerful. The blows do not break the metal, instead it actually strengthens the core. Just like forged steel,

CANiK has risen from the forge with strength, power, and flexibility in every area including its manufacturing and technological departments. It is with the knowledge of these trials that CANiK introduces the Rival-S, a firearm so forged that it is instantly ready to withstand every rival it is called upon to challenge.

# SF X RIVAL

When it came to naming the CANiK competition pistol, the challenge was to find a name that defined the goal we had when creating the firearm itself. The goal was simple, this platform had to be equal to or better than anything used in the world of competitive sports shooting, giving the user a solid advantage to win! With this in mind, the name was soon apparent, this firearm was undoubtedly the "RIVAL".

Specification	Details

R11100 '00**

CANiK®'s latest innovation, the METE series, features a standardized Compact size frame design. The METE SF, the Compact size pistol in this new series, boasts a 106.5 mm barrel length and an overall length of 185 mm. Enhanced with an improved beaver tail, more aggressive front slide serrations, a deepened trigger guard angle, and the new Holster Fit & Lock (HFL) feature designed for special holsters, the METE SF also incorporates a self-flared mag-well frame design.

# METE SFX

The Canik SFX Mete is a top-tier 9mm pistol engineered for superior performance and accuracy. Sporting a 5.2-inch match-grade barrel and an overall length of 8.29 inches, the SFX Mete delivers exceptional precision, making it ideal for both competitive shooting and self-defense. The pistol features a robust polymer frame, ensuring lightweight durability without compromising on strength. Equipped with a performance trigger, the SFX Mete provides a crisp, clean break, enhancing shooting consistency and speed. Its fiber optic front sight and adjustable rear sight offer quick target acquisition and customization to individual preferences. Additionally, the optics-ready slide comes with a mounting plate, allowing for easy attachment of red dot sights. Available in striking Tungsten Grey or classic Black finishes, the Canik SFX Mete combines aesthetics with functionality. The pistol also includes a Picatinny rail for attaching tactical accessories, expanding its versatility. With an 18-round capacity, the SFX Mete ensures ample firepower for any situation, while its ergonomic design offers a comfortable grip and superior control. Whether on the range or in a defensive scenario, the Canik SFX Mete stands out as a reliable and high-performing sidearm.

# TP9 ELITE COMBAT

The TP9 Elite Combat is a versatile compact pistol with performance parts designed by Salient Arms International in an industry-first collaboration, including a fluted and nitride-coated match-grade barrel, thread protector, fiber optic sights and mag well. The compact pistol has a polymer frame, is striker-fired and has an optics-ready slide with four different interfaces to accept the market's most popular reflex sights. An included cocking lever can be mounted to either side of the slide for fast loading. Extensions for the magazine release catch and alternate backstraps are included to enable an ideal fit. The pistol includes one 15-round magazine and one 18-round magazine with a +3 aluminum extension. Available in 9x19mm, the pistol has a Cerakote-over-Tenifer finish on the slide for long-lasting corrosion resistance. The internal firing control components are nickel plated for smooth operation and high performance. A patented holster, magazine loader and cleaning kit is standard in the package.
